# WEATHER SYNOPSIS BY REGION

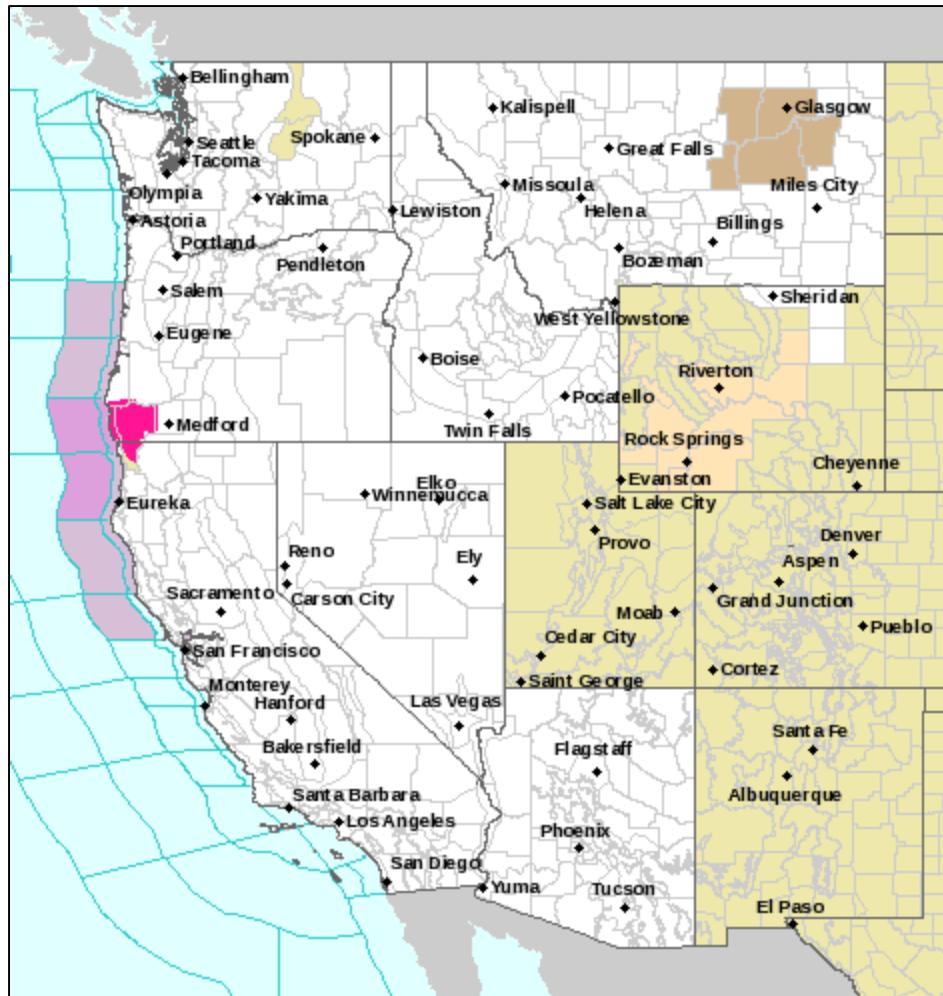

## **NORTHERN CALIFORNIA**

- Localized gusty N-NE winds coupled with low Relative Humidity (RH) across the northwest third of the region through tonight.
- Weak trough influence early this week with the region caught between a stronger ridge to the south a deep trough to the N and NW late week into the weekend.
- Localized gusty N-NE and NW winds through tonight. Gust speeds generally ranging between 20-25 mph favoring higher ridges found within Del Norte/Siskiyou counties as well as portions of Shasta county. A weak northerly flow will affect the near river portion of the Sacramento Valley this morning and later tonight.
- Return to S-SW-W flow most areas Tuesday and increasing on Wednesday with general gusts between 20-25 mph favoring Shasta Valley and area along and east of the Cascade and Sierra Crest.
- Low humidity remains today and tonight with a small incremental rise during the rest of the week. Single digits and teens will be observed most areas once again this afternoon. Much higher readings found near the coast.
- Temperatures remaining above normal most areas through the week then trending near normal during the weekend.
- Precipitation is not likely during the next 7 days. With that being said, slight chance of drier thunderstorms over or near the Tahoe Basin Tuesday evening. A few stronger cumulus buildups could be found further north such as over Plumas county.

## **SOUTHERN CALIFORNIA**

- A weak trough will remain stationary over California through Wednesday and then high pressure will approach California from the Pacific Ocean late in the week.
- Isolated afternoon and evening showers and thunderstorms will form over the Sierra Crest and Northern Deserts through Wednesday.
- Morning low clouds and fog from a deep marine layer will make it over the lower coastal mountain slopes through Wednesday.
- Maximum temperatures will be near to a little below normal through Wednesday, with 70s to low 80s across the mountains and 80s to mid 90s in the valleys.
- Temperatures will become a little above normal Thursday through this weekend.
- Minimum humidity will be mainly between 15%-30% above and inland from the marine layer through Wednesday and then drop into the teens Thursday through this weekend.
